

Medleaf LL Kush

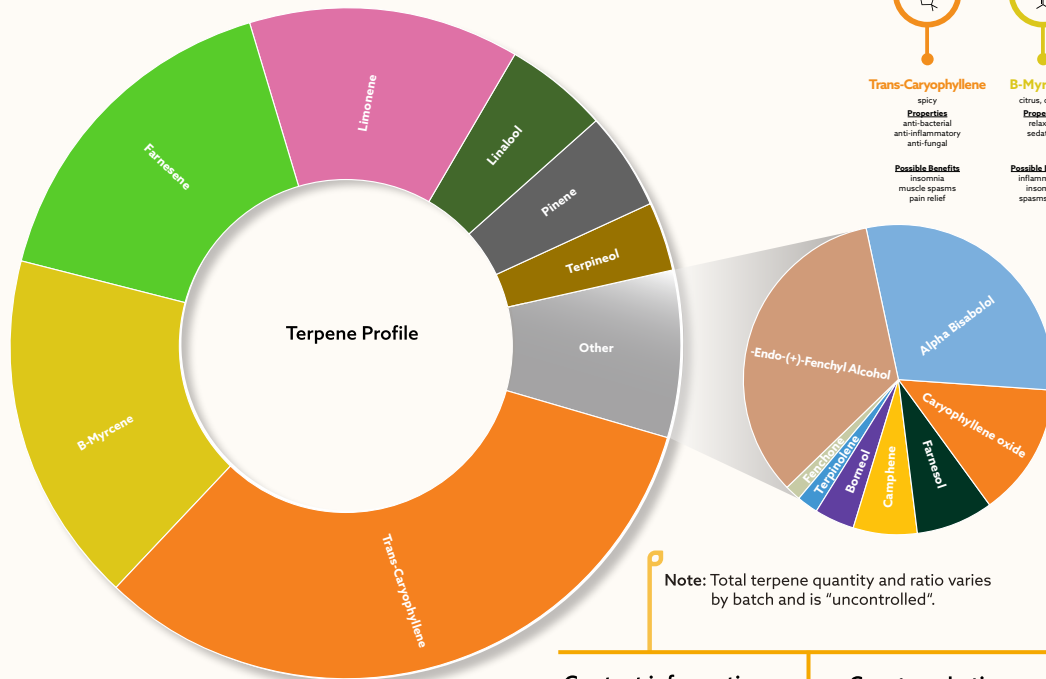

LL KUSH ACTIVE INGREDIENTS: TOTAL THC 23% TOTAL CBD <1%

The Medleaf Spectrum

Genetics Spectrum

Note: Total terpene quantity and ratio varies by batch and is "uncontrolled".

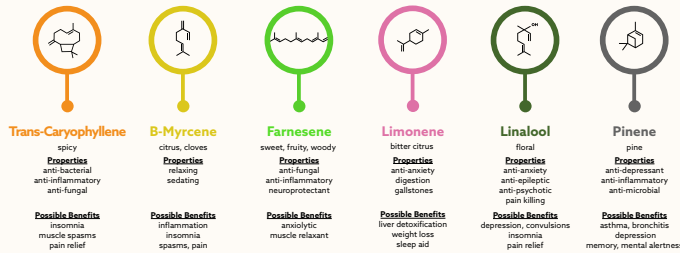

FLOWER CHARACTERISTICS

Medleaf LL Kush is a greenhouse grown and derived from a rare cultivar "Legendary Larry" and is considered a High THC dried flower product.

The cultivar's parent lineage is a cross of Larry OG and Legend OG, both of which list OG Kush, a relatively balanced hybrid as a parent. Another grandparent include San Fernando Valley (SFV) OG. This pairing of various OG Kush cultivars crosses results in a Medium to Heavy Indica expression, without the "classic" Indica chemical profile.

AROMA

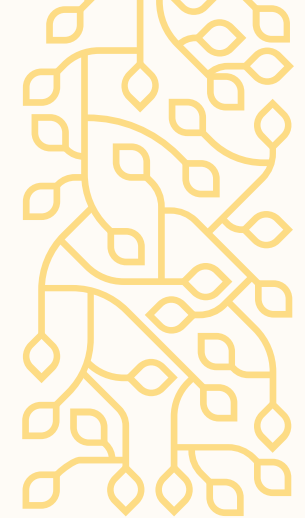

Slightly peppery with predominantly earthy, piney tones, laced with classic OG Kush characteristics.

Note: All properties and benefits are considered preclinical and evidenced by lab dish (*in vitro*) and animal (*in vivo*) studies.
